

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Canceled)

2. (Currently Amended) A medical material comprising:

a base material,

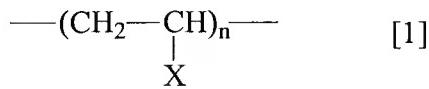

a diamond-like carbon film formed on a surface of said base material, and

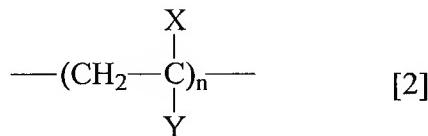

a biocompatible component covalently bonded to a surface of the diamond-like carbon film,

wherein said biocompatible component is a polymer of ~~vinyl monomers, vinylidene monomers, vinylene monomers or cyclic vinylene monomers.~~ chain,

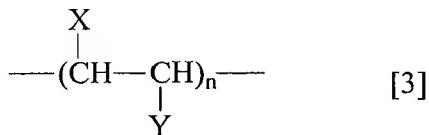

one end of the polymer chain is covalently bonded to the surface of the diamond-like carbon film, and

polymer chain has a structure represented by any one of the following formulas [1]-[3]:

[2]

[3]

wherein X and Y each an ester or amido, and X and Y when in the same molecule are identical or different from one another, and

n is an integer equal to or more than 2.

**3-8. (Canceled)**

**9. (Original)** The medical material of claim 2, wherein an intermediate layer is provided between the base material and the diamond-like carbon film to improve adhesion between the base material and the diamond-like carbon film.

**10. (Original)** The medical material of claim 9, wherein the intermediate layer is an amorphous film containing silicon and carbon as primary constituents.

**11. (Canceled)**

**12. (Previously Presented)** The medical material of claim 2, wherein the base material is a metal material, ceramic material, or macromolecular material, or a complex thereof.

13. **(Previously Presented)** A medical instrument formed by using the medical material of claim 2.

14. **(Original)** The medical instrument of claim 13, wherein the medical instrument is a medical instrument which is to be embedded in a living body.

15. **(Original)** The medical instrument of claim 14, wherein the medical instrument is a catheter, guide wire, stent, artificial cardiovalvular membrane, or artificial joint.

16-27. **(Canceled)**

28. **(Previously Presented)** The medical material of claim 2, wherein the biocompatible component is a polymer of hydrophilic 2-hydroxypropyl methacryl amide.

29. **(Currently Amended)** The medical material of claim 2, wherein A medical material comprising:

a base material,

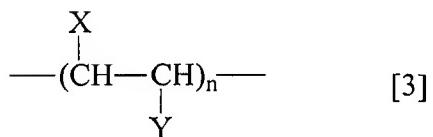

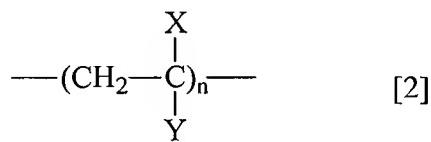

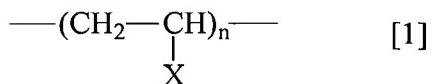

a diamond-like carbon film formed on a surface of said base material, and

a biocompatible component covalently bonded to a surface of the diarnond-like carbon film,

wherein said biocompatible component is a polymer chain,

the polymer chain is covalently bonded via an ester linkage to the surface of the diamond-like carbon film, and

the polymer chain has a structure represented by any one of the following formulas [1]-[3]:

wherein X and Y each an ester or amido, and X and Y when in the same molecule are identical or different from one another, and  
n is an integer equal to or more than 2.

30. (Canceled)
